

ROLE MODEL AGREEMENT

Thank you for your interest in supporting the National Math + Science Young Leaders Program.

Program Details:

The National Math + Science Young Leaders Program is a collaboration between the National Math + Science Initiative, FORTUNE and ExxonMobil that addresses the pressing issue of women being left behind in the critical fields of math and science. The program partners young women majoring in Science, Technology, Engineering, and Math (STEM) with FORTUNE's Most Powerful Women to learn about leadership and job opportunities for STEM backgrounds in the workplace.

Program Elements:

- Mentor/Student Communication: Executives will correspond with their student via phone and email throughout the semester to share career development and leadership advice.
- Web Seminars: Each executive will participate in one scheduled web seminar on a pre-arranged topic.
- Company Site Visits: Executives will meet their student and host a site visit to their corporation.
- Capstone Program: The program concludes with an intense three-day program in NYC consisting of roundtables, tours, and discussions with national STEM leaders. *Executive participation is optional.*

Commitment:

The Young Leaders Program takes place throughout January – June 2010. Corporations are responsible for travel costs for student participation in the company site visits and Capstone Program in NYC.
